

The New 2018 Ford F150

The 2018 Ford has been revamped with an impressive array of upgrades all around the vehicle. Here is a breakdown of key factors for their new line of their most popular truck. Whether you are buying or leasing, here is what you need to know about Ford's best selling truck for decades and the bestselling vehicle overall in the United States for 35 years.

The 2018 Ford F-150 Quick Facts

Fair Market Price **\$29,701** MSRP **\$29,380**

Estimated Monthly Payments For Leasing **\$535 / month** EPA Miles Per Gallon **18 city** **24 highway**

Horsepower **290** Torque **265**

Drivetrain: Rear Wheel Drive

The F-150's 40th Birthday Means Impressive Changes

The 2018 model comes with a 3.0 liter V6 turbodiesel option.

The turbodiesel engines are powerful as ever with a 10-speed automatic transmission.

The traditional gas engines have been revamped, with a new twin-injection system.

The traditional engines are 3.3 liter 6-speed automatic transmissions.

The EcoBoost 2.7 liter V6 option also gets a twin-injection system.

The 5.0 liter Coyote V8 now has a plasma-transferred wire arc spray-bore cylinder lining for less weight but still packing a punch.

Safety First

The 2017 F-150 had a **5 star** overall safety rating from NHTSA, and the 2018 model builds upon those features with pedestrian assist, adaptive cruise control, and more for additional safety on the road.

Expanded Features And More

Ford's SYNC 3 technology on board helps you connect your device to your car for ultimate control while driving.

More infotainment and connectivity features than ever before.
